Structure

Complete the following checklist to make sure you completed all parts of the team project. Mark your response with **Yes** or **No**. If the answer is **No** then additionally describe what was preventing you from completing this step.

| Question

Your Team Response

Did you use the correct README.md template from the Team Project Description YES
document in I-Learn? YES
Did you completely populate the README.md template? YES
Did you publish the code with the README.md (in the top-level folder) into a

Your Team Response
public GitHub repository? YES
Did you include useful comments in your code? YES
Did you include and use a Database in your project? YES
Demoed via video or in class the team project YES

Requirement Completion

List all of your project requirements from your Project Plan below (add more rows if needed) and indicate if you have completed them. Mark your response with **Yes** or **No**. If the answer is **No** then additionally describe what was preventing you from completing this requirement.

Retrospective

What was at least one connection you made in this class to the Gospel of Jesus Christ?

In what ways has this class better helped you understand your role as a deciple of Christ in the workforce?

In what ways has this class improved your confidence in recieving and preparing for an internship?

I was blessed with an amazing team and an even awesome-er teacher as support. We felt like a working family and we were very close to each other. I think the light of Christ was able to be seen in our faces everytime we showed up to class because we enjoyed each other's company so much. I know that every person on this team had their own role, and even if mine was to help support and encourage my other team members, I will do that duty to the best of my abilities to make this team run smoothly through out this project. I feel more and more prepared for an internship solely because of the dedication and work put into it. I feel proud of what I have accomplished and I am excited to share what I have done and show my achievements to any internships available.

Challenges

What was your greatest challenge you faced while building the project.

How would you approach the challenge differently if you were faced with it or a similar challenge in the future?

A big challenge for me was learning how to use my terminal to update, download, switch directories, and fix mistakes I made along the way. Learning how to use GitHub in the beginning was also a major difficulty, especially in my group. One for me I felt was really difficult was putting css onto the site when main wasn't merged with everyones completed components yet. I felt like I was constantly making css for old versions of what my teammates were making and it constantly had to be updated and matched with theirs in order for the css to match up.

Praise

Which person (or persons) on your team deserve special recognition for doing great work? **Make sure that they know how much you appreciate their efforts!**

I would say that Celeste did amazing with the css, Isaiah and Jacob with firebase, Joseph with the contact us page, Holden with the vite and main habitling compnent page, and Hannah with the sprites. They each did amazing at their parts and really made this team a whole.

Improvements

How did you help struggling team members along the way? This could be things that you did to encrouage their engagement in the project.

I think most of the help was going towards me and making sure everything was downloaded and updated properly as well as keeping up with all of github. I had a hard time doing that myself. I think I mostly tried to help Hannah out in the baginning and had her help me pick out the color schemes so that she felt included. Later down the line, I made sure to stay after class a little bit every once in a

while to help out Isaiah with last minute squash and merging needing to be done and counted as one of the two approvals that he needed.

Complete the Table Below:

Fill out the `Name` column of all team members excluding yourself.

Fill out the `Participation Percentage` with the percent of participation and engagement of that particular teammate throughout the semester.

- 0 meaning the student was not present/engaged throughout the semester
- 100 meaning the student was present/engaged throughout the entirety of the semester

Consider things like planning, code, demo preparation, and other group related things in your decision.

`|Name|Participation Percentage|`

- Celeste Wahlquist --> 100
- Joseph Norales --> 100
- Hannah Crenshaw --> 100
- Isaiah Carrin --> 100
- Holden Turman --> 100
- Jacob Emhoff --> 100
